

## Project Purpose

Current website remains unable to provide adequate information in a timely and easy manner to the community in all three main areas: 1) Presentation of static information - difficult and time consuming; 2) Forms and static interaction processes - not available or difficult to change; and 3) Interaction and integration with interactive sites and places - not available or extremely difficult to manage - i.e. Facebook, Twitter, Flickr. Current internal site is difficult to maintain and lacks the ability to integrate with other sources of information. Many do not use the Delphi site and fragmented e-mail notifications do not allow for tracking, registration, or coherent communication amongst departments; wasting time and limiting response.

## Project Description

For website: Redesign all of the processes, most back end systems that feed and populate the website, redesign of the website, and integration of current calendar, internal request systems, and reporting / For Intranet - Installation and upgrade of Sharepoint within Lenexa to provide integration with Exchange/Outlook, ADP, Munis, Accela, Lucity, mobile systems access, security, and most internal administrative processes including reporting and analytics available for each department.

## Location

City Hall

## Designer

To be determined.

## Contractor

To be determined.

## Implementation Timeline

2014 - 2015

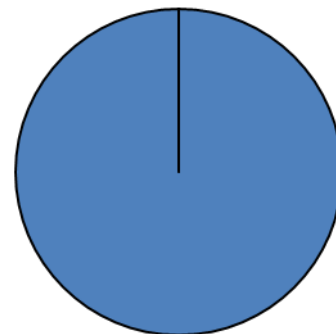

## Total Cost

\$867,000

## Funding Sources

City: \$867,000 (100%)

- Capital Improvement Fund (CIF)
